توضیحات

I'm a passionate web developer with nearly 2 years of experience, specializing in C# and its .NET Core Framework. My journey into the world of coding began during high school, and I've been dedicated to turning human logic into zeros and ones ever since.

You'll often find me immersed in open-source projects. Check out my GitHub profile: <https://github.com/itz-amethyst>

Beyond the binary world, I have been interested in 3D web design, exploring the intersection of creativity and technology to bring my idea into reality.

Currently i'm diving into Python, Django, and FastAPI to enhance my toolkit. Obsessed more with FastAPI after exploring various tools! Its speed, simplicity, and open-source community.

If you're curious about C#, .NET, and now Python, Svelte technologies, feel free to contact me.
